SUMMARY

Detail-oriented and passionate Full Stack Developer with hands-on experience building production-ready web applications. Developed **Stride**, an enterprise-grade job portal, utilizing **React 19, Vite, and Tailwind CSS v4** on the frontend, and a **Java Spring Boot REST API** secured with **Spring Security (JWT)** and **PostgreSQL** on the backend. Strong understanding of client-side cache management (TanStack Query), state-driven dual-dashboards, and role-based access control. Eager to bring end-to-end application development skills to a dynamic engineering team.

EDUCATION

CHAUDHARY CHARAN SINGH UNIVERSITY BACHELOR IN SCIENCE • 60
MATHEMATICS Meerut, Uttar Pradesh, India • Aug 2020 - May 2024
https://www.ccsuniversity.ac.in/

IGNOU MASTERS IN COMPUTER APPLICATIONS • 60
Computer Applications Maidan Garhi, New Delhi-110068 • Jan 2025 - Dec 2026
https://www.ignou.ac.in/

EXPERIENCE

Springer Capital Wilmette, Illinois (Remote)
Backend Developer Intern Aug 2025 – Nov 2025

• Designed and developed RESTful microservices and internal modules including data ingestion APIs, authentication layers, and reporting services using Django REST Framework.

• Engineered ELT (Extract-Load-Transform) workflows to process API data and store it in optimized PostgreSQL and MySQL relational databases.

• Boosted system performance and response times by 25% through strategic optimization of database queries and backend logic.

• Improved system reliability and maintainability by debugging, refactoring code, and documenting technical workflows to support team deployments and onboarding

PROJECTS

Stride – Enterprise Full-Stack Job Portal

Tech Stack: React 19, Vite 8, Tailwind CSS v4, TanStack React Query, Axios, Java, Spring Boot, Spring Security, JPA, PostgreSQL, Git.

- **GitHub (Frontend):** https://github.com/Kawatra-29/job-portal-frontend
  GitHub (Backend): https://github.com/Kawatra-29/job-portal-backend
- **Dual-Dashboard Architecture:** Designed and built a dynamic dual-user ecosystem web application containing personalized workflows, analytics, and metrics dashboards for both Job Seekers and Employers.

- **Robust Security & JWT Authentication:** Implemented secure session handling using **Spring Security** and JSON Web Tokens (JWT). Built custom interceptors to auto-inject Bearer tokens in headers and handle automatic session timeouts on 401 Unauthorized responses.
- **Optimized State & Cache Management:** Integrated **TanStack React Query** for client-side query caching and data synchronization, reducing server calls and ensuring consistent real-time job and application feeds.
- **Interactive Candidate Pipeline:** Engineered a dynamic recruitment tracker allowing employers to seamlessly move candidates through stages (Pending, Shortlisted, Interviewing, Hired, Rejected) with real-time state updates.
- **Database & Routing Design:** Created relational database schemas in **PostgreSQL** using Spring Data JPA and configured declarative role-based routing (JOBSEEKER/EMPLOYER) on the frontend via React Router v7.
- **Modern UI & Performance:** Styled a fully responsive interface using **Tailwind CSS v4** featuring a fluid light-to-dark mode switcher, custom form validations via React Hook Form, and code-splitting (lazy loading) to minimize load times.

SKILLS

JAVA

ADVANCED

Core Java, Spring Boot, Spring Security, Spring Data JPA, OOPs, RESTful APIs

●●●●○

REACT.JS

ADVANCED

●●●●○

CSS & DESIGN

ADVANCED

Tailwind CSS v4, HTML5 & CSS3, Responsive Web Design, Dark/Light Mode, UI/UX Design

●●●●○

DATABASES

ADVANCED

PostgreSQL, SQL Queries, Database Schema Design, Hibernate, JPA

●●●○○

DEVELOPER TOOLS

INTERMIDIATE

Git, GitHub, Postman, npm, VS Code, Railway

●●●○○
